WOOD LOGISTICS SOFTWARE

100% TRANSPARENCY AND SECURITY WITH GLOBAL LOG MANAGEMENT

Minimum effort, maximum control and transparency: with the globally exclusive Global Log Management by Latschbacher you can monitor your delivery at all times from the moment of felling. Firmly fixed tags with consecutive, tamper-proof numbering document every single shipment in a central database that can be loaded and checked at any time. This guarantees perfectly organised timber logistics with controlled sourcing and flawless documentation!

CENTRAL DATABASE

2. LOGISTICS

1. REGISTRATION

3. MONITORING

FAST & EASY TO USE

1. REGISTRATION
The mobile registration software, compatible with all standard Android devices, registers the logs and synchronises them with the central database.
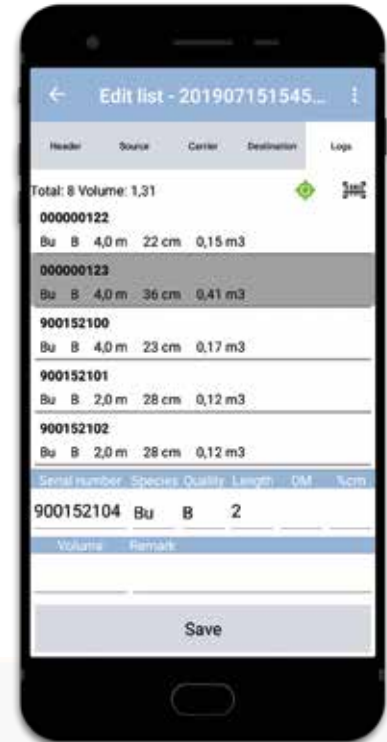

2. LOGISTICS
Using a scan for straightforward reposting of the logs when collecting them from the forest or loading them onto another vehicle allows full control of every step of the delivery chain.

3. MONITORING
All the information can be retrieved using a bar code scan and log number. The tamper-proof evaluation of data and statistics provides complete documentation of your shipment's origin.

HOW GLOBAL LOG MANAGEMENT WORKS

Clearly identifiable tags, a mobile app and a central web application make global log management the perfect all-in-one solution for timber logistics that fulfils every requirement.

How Global Log Management works
Global Log Management is based on total transparency and the traceability of your wood. First of all, the logs are tagged and the relevant parameters of each one entered in the app. The log number and bar code on the tags allows all the information on a particular log to be loaded onto any Android device.

How safe are the Signumat tags?
Every time you buy a tag you automatically gain access to the Global-Log-Management.com booking system. With the consecutive and clear numbering of the

Signumat tags the current status of the shipment and its completeness can be checked at any time. The tags can be removed from the log without damaging them. Furthermore, the numbers are lasered, not printed, which makes them absolutely tamper-proof.

What are the advantages of the central database?
The highest possible safety standards make Global Log Management your reliable partner for timber logistics. Full information on your shipment is stored in an independent central database. Nobody except those authorised to do so has access to the entire story of the log.
